

At The National College, our WakeUpWednesday guides empower and equip parents, carers and educators with the confidence and practical skills to be able to have informed and age-appropriate conversations with children about online safety, mental health and wellbeing, and climate change. Formerly delivered by National Online Safety, these guides now address wider topics and themes. For further guides, hints and tips, please visit nationalcollege.com.

What Parents & Educators Need to Know about WHATSAPP

AGE RESTRICTION 13+

WHAT ARE THE RISKS?

With more than two billion active users, WhatsApp is the world's most popular messaging service. Its end-to-end encryption only allows messages to be viewed by the sender and any recipients: not even WhatsApp itself can read them. The UK's Online Safety Bill proposes to end such encryption on private messaging, but for the time being, this controversial feature remains.

EVOLVING SCAMS

WhatsApp's popularity makes it a lucrative hunting ground for scammers. Recent examples include posing as the target's child, requesting a money transfer because of a spurious 'emergency' – plus a scam where fraudsters trigger a verification message by attempting to log in to your account, then [posing as WhatsApp] call or text to ask you to repeat the code back to them, giving them access.

CONTACT FROM STRANGERS

To start a chat, someone only needs the mobile number of the WhatsApp user they want to message. Therefore, if a child has ever given their number out to someone they don't know, that person could then contact them via WhatsApp. It's also possible that the child might be added to a group chat or community (by one of their friends, for example) containing other people they don't know.

FAKE NEWS

WhatsApp's connectivity and ease of use allow news to be shared rapidly, whether it is true or not. To combat the spread of misleading messages, messages forwarded more than five times on the app now display a "Forwarded many times" label and a double arrow icon. This makes users aware that the message they've just received is far from an original... and might not be entirely factual, either.

CHAT LOCK AND SECRET CODES

In 2023, WhatsApp introduced a feature that lets users keep their chats in a separate 'locked chats' folder, saved behind their phone's passcode, fingerprint or face ID. There is an alternative feature called 'Secret Codes' where users set a unique password for locked chats. Unfortunately, this creates the potential for young people to hide conversations and content they suspect their parents wouldn't approve of.

VIEW ONCE CONTENT

The ability to send images or messages that can only be viewed once has led to some WhatsApp users sharing inappropriate images or abusive texts, knowing that a recipient can't re-open them later to use as evidence of misconduct. People used to be able to screenshot this disappearing content – but a recently added WhatsApp feature now blocks this, citing protection of privacy.

VISIBLE LOCATION

WhatsApp's location feature lets users share their current whereabouts, which can be helpful for friends meeting up or parents checking that their child is safe while out, for example. However, anyone in a user's contacts list or in a mutual group chat can also track their location – potentially letting strangers identify a child's home address or journeys that they make regularly.

Advice for Parents & Educators

SET CODE

EMPHASISE CAUTION

Encourage children to treat unexpected messages with caution: get them to consider whether it sounds like something a friend or relative would really send them. Make them aware of the risks of clicking on links in messages, and to be wary of clicking on any links in messages. Setting up two-step verification adds a further layer of protection to their WhatsApp account.

ADJUST THE SETTINGS

It's wise to change a child's WhatsApp settings to specify which of their contacts can add them to group chats without needing approval. You can give permission to contacts by name or by group. Except... ultimately, if a child needs to use Live locations, emphasize that they should enable this function for only as long as they need – and then turn it off.

CHAT ABOUT PRIVACY

Check in with the child about how they're using WhatsApp, making sure they know you only have their safety at heart. If you spot a Locked Chats folder, you might want to ask them what it is for and why they've stored in there, who they're talking to, and why they want to keep these chats hidden. Also, if children send any View Once-content, it could be helpful to ask them why.

DISCUSS GROUP CHATS

Make children aware that there could be members of a group that they don't know well and that words could be misinterpreted. Encourage them to leave a good impression, to avoid joining in if conversations turn towards bullying, and to respond to such situations in an appropriate way. Make sure they know that it's OK to leave a group chat if it makes them uncomfortable – or for any reason, in fact.

THINK BEFORE SHARING

Help children understand why it's important to stop and think before posting or forwarding something on WhatsApp. It's easy – and all too common – for content that a user posts to be shared more widely, even publicly on social media. Encourage children to consider how an impulsive message or forwarding might damage their reputation or upset a friend who sent something to them in confidence.

Meet Our Expert

Dr Cliona Sutherland is an online safety consultant, educator and researcher who has developed and implemented anti-bullying and cyber safety policies for schools. She has written various academic papers and carried out research for the Australian Government comparing internet use and sexting behaviour of young people in the UK, USA and Australia.
